Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election

1. Applicants elect species I and subspecies I without traverse is acknowledged and entered. Claims 1-6 are readable on both species I and subspecies I, and figures 3-5 are corresponding to both species. Claims 7-13 are withdrawn from consideration. An action on the merits follows.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Saita (US. patent 5,327,986).

Saita discloses a motor driving method for a steering apparatus, comprising the steps of:

- a. providing two motors (14, 15) for applying an auxiliary steering force to a steering system;
- b. in operating the two motors (col 3 lines 20-34), operating one of the two motors first; and
- c. after operating the first motor, operating the other motor, and

d. the output capacities of the two motors are different (col 1 lines 58-68).

With respect to claims 3 and 5, Saita discloses all of the claimed limitations.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Saita in view of Geyer et al (US. publication no. 2003/0111290 A1, dated 6/19/03).

Saita is disclosed above but lacks the back up feature that allows one motor to remain in operation while the other motor is failed.

Geyer discloses a power steering system with dual motors and that upon detection if one motor has failed, the other motor will remain in operation as a back up system.

Based on the teaching of Geyer, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the power steering system of Saita to include the fail safe feature of Geyer so as to provide the power steering system with a back up means if one of the motor fail during operation.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hackl et al. ('681), Ogawa et al. ('424), and Ewbank et al. ('969) are cited of interest.
